新加坡新建筑
NEW ARCHITECTURE IN SINGAPORE

2 绿植幕墙 / Green facade

The design calls for a total transformation of an old Hotel into the new boutique Naumi Hotel. We infused art, architecture and interior design to conceptualise a new art-influenced holistic environment here at an urban Seah Street location.

On the Facade, the design response is a refreshingly progressive geometric topiary screen, executed through faceted metal perforated screens for cultivation of climbing and flowering creepers. Sustained by automated irrigation and hydroponics, the green façade acts as a second skin insulating the building from direct sun while simultaneously tapping solar energy for landscape growth in a self-sustainable loop. The faceted angle is also determined by angling such that the maximum amount of sunlight exposure is allowed for the creepers, along with being able to create an interesting play of light and shadow as the day passes.

The screen is sustained by automated irrigation and hydroponics and is almost maintenance free. At night, the plants are highlighted with well-concealed lighting, creating a glowing green strip that accentuates the corner of a busy street.

Entering Naumi lobby and lounge, modern lifestyle design and simple pleasures combine to offer a different experience of the Natural. At the Lobby, laser-cut steel sheets in floral filigree create depth and shadow play as a delightful backdrop to the space. Coupled with subtle colour-changing lights, the lobby lounge fluidly changes moods for day and night dining experiences. An origami-inspired sculptural polished steel bar counter and faceted wall paneling assert the design intention on the facade. Zanotta's Dora Chairs dot the lobby lounge from breakfast to dinner, transitioning the space, through mood lighting, into a whiskey bar at night.

The Rooftop Pool and Bar is another transformable place where a 'folded' roof dances above Dedo poolside loungers offering shade for guests in the day. The infinity-edge pool offers guests a cool dip, open to sky and sun. Come night, the pool is a cool, placid glass surface set for evening poolside drinks in the city.

The Guestrooms explore subtle, discreet design to enhance space and light. A serene sense of respite is executed through neutral lightwoods, clean mirror and glass surfaces. Accents of luxe material and textures through accessories and thoughtful details energise the neutrality of the room. Italian lamps and customised laser-cut art provide contextual rooting and visual delight.

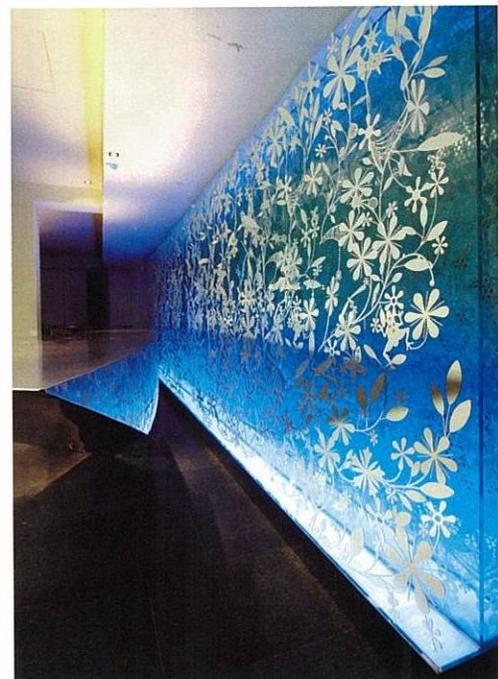

Naumi Bathrooms are spacious and pampering with rich white-veined marble finishes to embody purity. Suite bathrooms complete the luxurious mirage with customized steam and shower rooms. □
